

Bee Movie

There's no such thing as an ordinary bee.

Like many new graduates, Barry B. Benson is excited to enter the workforce and make a difference in his community, New Hive City.

But, Barry soon discovers that he wants more out of life than the inevitable career that awaits him at Honex, making honey like all the other bees. Instead, he wants to stop injustice and improve the quality of life for his fellow bees.

Despite the advice of his family and close friends, Barry flies off to make a difference and quickly realizes he is in over his head. Changing the world is no job for one bee.

Like the challenges and issues we face in our very own communities, Barry begins to see how complex his community really is. He starts to collaborate with community leaders and residents, and gains a new appreciation for the contributions each worker bee makes to Honex.

And, in no time, everyone is working together to better New Hive City.
