

A New Way...Community

We have both an opportunity and a problem: a public seeking positive change and a public in fear of the change that is going on all around them.

Our challenge is to help people to find a new way.

This new way needs to be grounded in a belief in community and in people working together to create a better world.

This new way needs to help people experience the power of community, bringing about positive change and enabling a positive future.

We have chosen to address the issue of poverty to help people find this new way.

A New Way...Community
